

About Some clients are concerned taking this as an option if they have not used youtube.com in the past. However the benefits for having it hosted on youtube are great. Youtube.com worth now more than 8 Billion received in June 2008 37% of the total internet usage in the States. It is the preferred viewing platform for the demographic of 18 - 42years and works in conjunction with some of the biggest networking sites such as facebook.com & myspace.com. As Youtube.com is the 'TV' of the internet people are more familiar with it as a viewing platform than any other. If this is a option you wish to take we can upload it to this site and supply you with a link to be embedded in your site free. What does this mean? As a business showcasing your product to the world is now simpler & cheaper than ever before. If you think your business would benefit from video streaming, contact Immersion Imagery and one of our team will be happy to provide you with more information. Services: • Production • Editing • Output to required format • Hosting options Benefits of video streaming: • Exposure • Increasing SEOing • Succinctly representing an idea • Desired viewing medium • Larger demographic targeting What we can offer: Production: A High quality HD based video capturing all the views of the location that you require, incorporating graphics such as schematic diagrams, or relevant text. Output: To DVD and in a Video Streaming format such as FLV or Quicktime for your website. 5 x DVD 1 x CD containing a FLV or Quicktime file as backup Please contact us with information on the type and length of production you require so we can send you a quote accordingly.

These extracts look fantastic the way you've done them. Yesterday we put them on the website and in the first day we noticed an interesting doubling of the number of pages viewed per visit, so it's looking good. - Dr Amanda Sainsbury-Salis PhD
